Commercial Landscaping Maintenance & Snow Removal

## Able Landscaping Ltd.

Commercial Landscaping Maintenance & Snow Removal

Able Landscaping is a full-service Commercial Landscaping Maintenance and Snow Removal business serving Southern Alberta Since 1988. Owner, Wayne Thomas brings over three decades of leadership experience to his team as a certified Horticulturist and Arborist, personally overseeing Able Landscaping's commitment to proven innovation, increased productivity and superior results.

Able Landscaping is recognized for a high standard of environmentally sustainable practices, 24/7 availability and employing only fully qualified personnel to operate their state-of-the-art equipment. These standards position Able Landscaping to successfully and safely provide the highest quality of commercial service while ensuring our clients are completely satisfied with the aesthetics of their properties.

## Landscaping and maintenance

The right tools to do the best job every time.

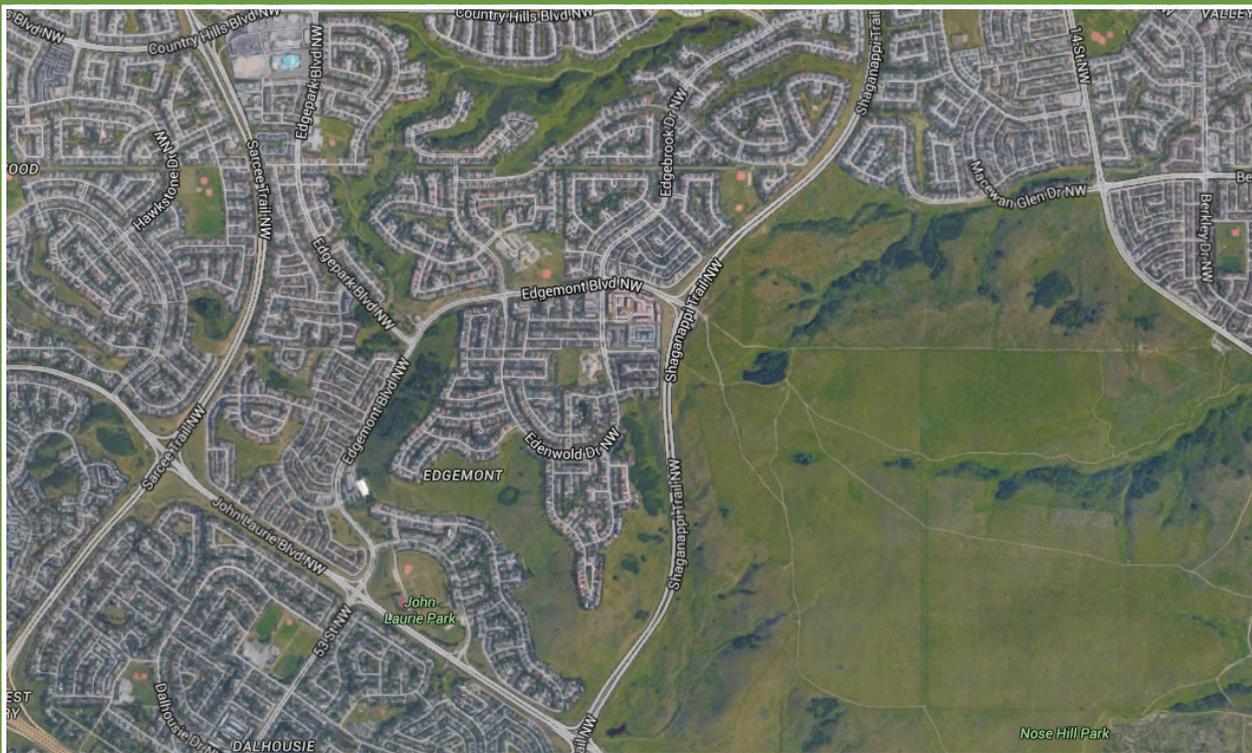

*Proven Innovation. Increased productivity. Superior results.*

**“At Able Landscaping,  
we provide innovative,  
environmentally sustainable  
and cost-effective commercial  
landscaping solutions and  
services...”**

...Our highly trained, certified personnel and extensive inventory of state-of-the-art equipment ensure our continued commitment to a superior standard of productivity, reliability and results.”

# Capacity to maintain entire communities such as Edgemont.

*Proven Innovation. Increased productivity. Superior results.*

# Sweeping and Asphalt Remediation

At Able Landscaping we understand that many customers' first impression of a company starts with their parking lot and we would love to help you make a great first impression.

For years Able has been providing fast, safe and environmentally friendly cleanups for parking lots in Calgary.

We are quick, efficient and haul away any and all debris collected when we finish. No piles are left in your parking lot.

Our highly skilled and fully certified team members use top of the line equipment to finish all our projects, big or small, in as little time as possible to help ensure minimal interference with your business and customers.

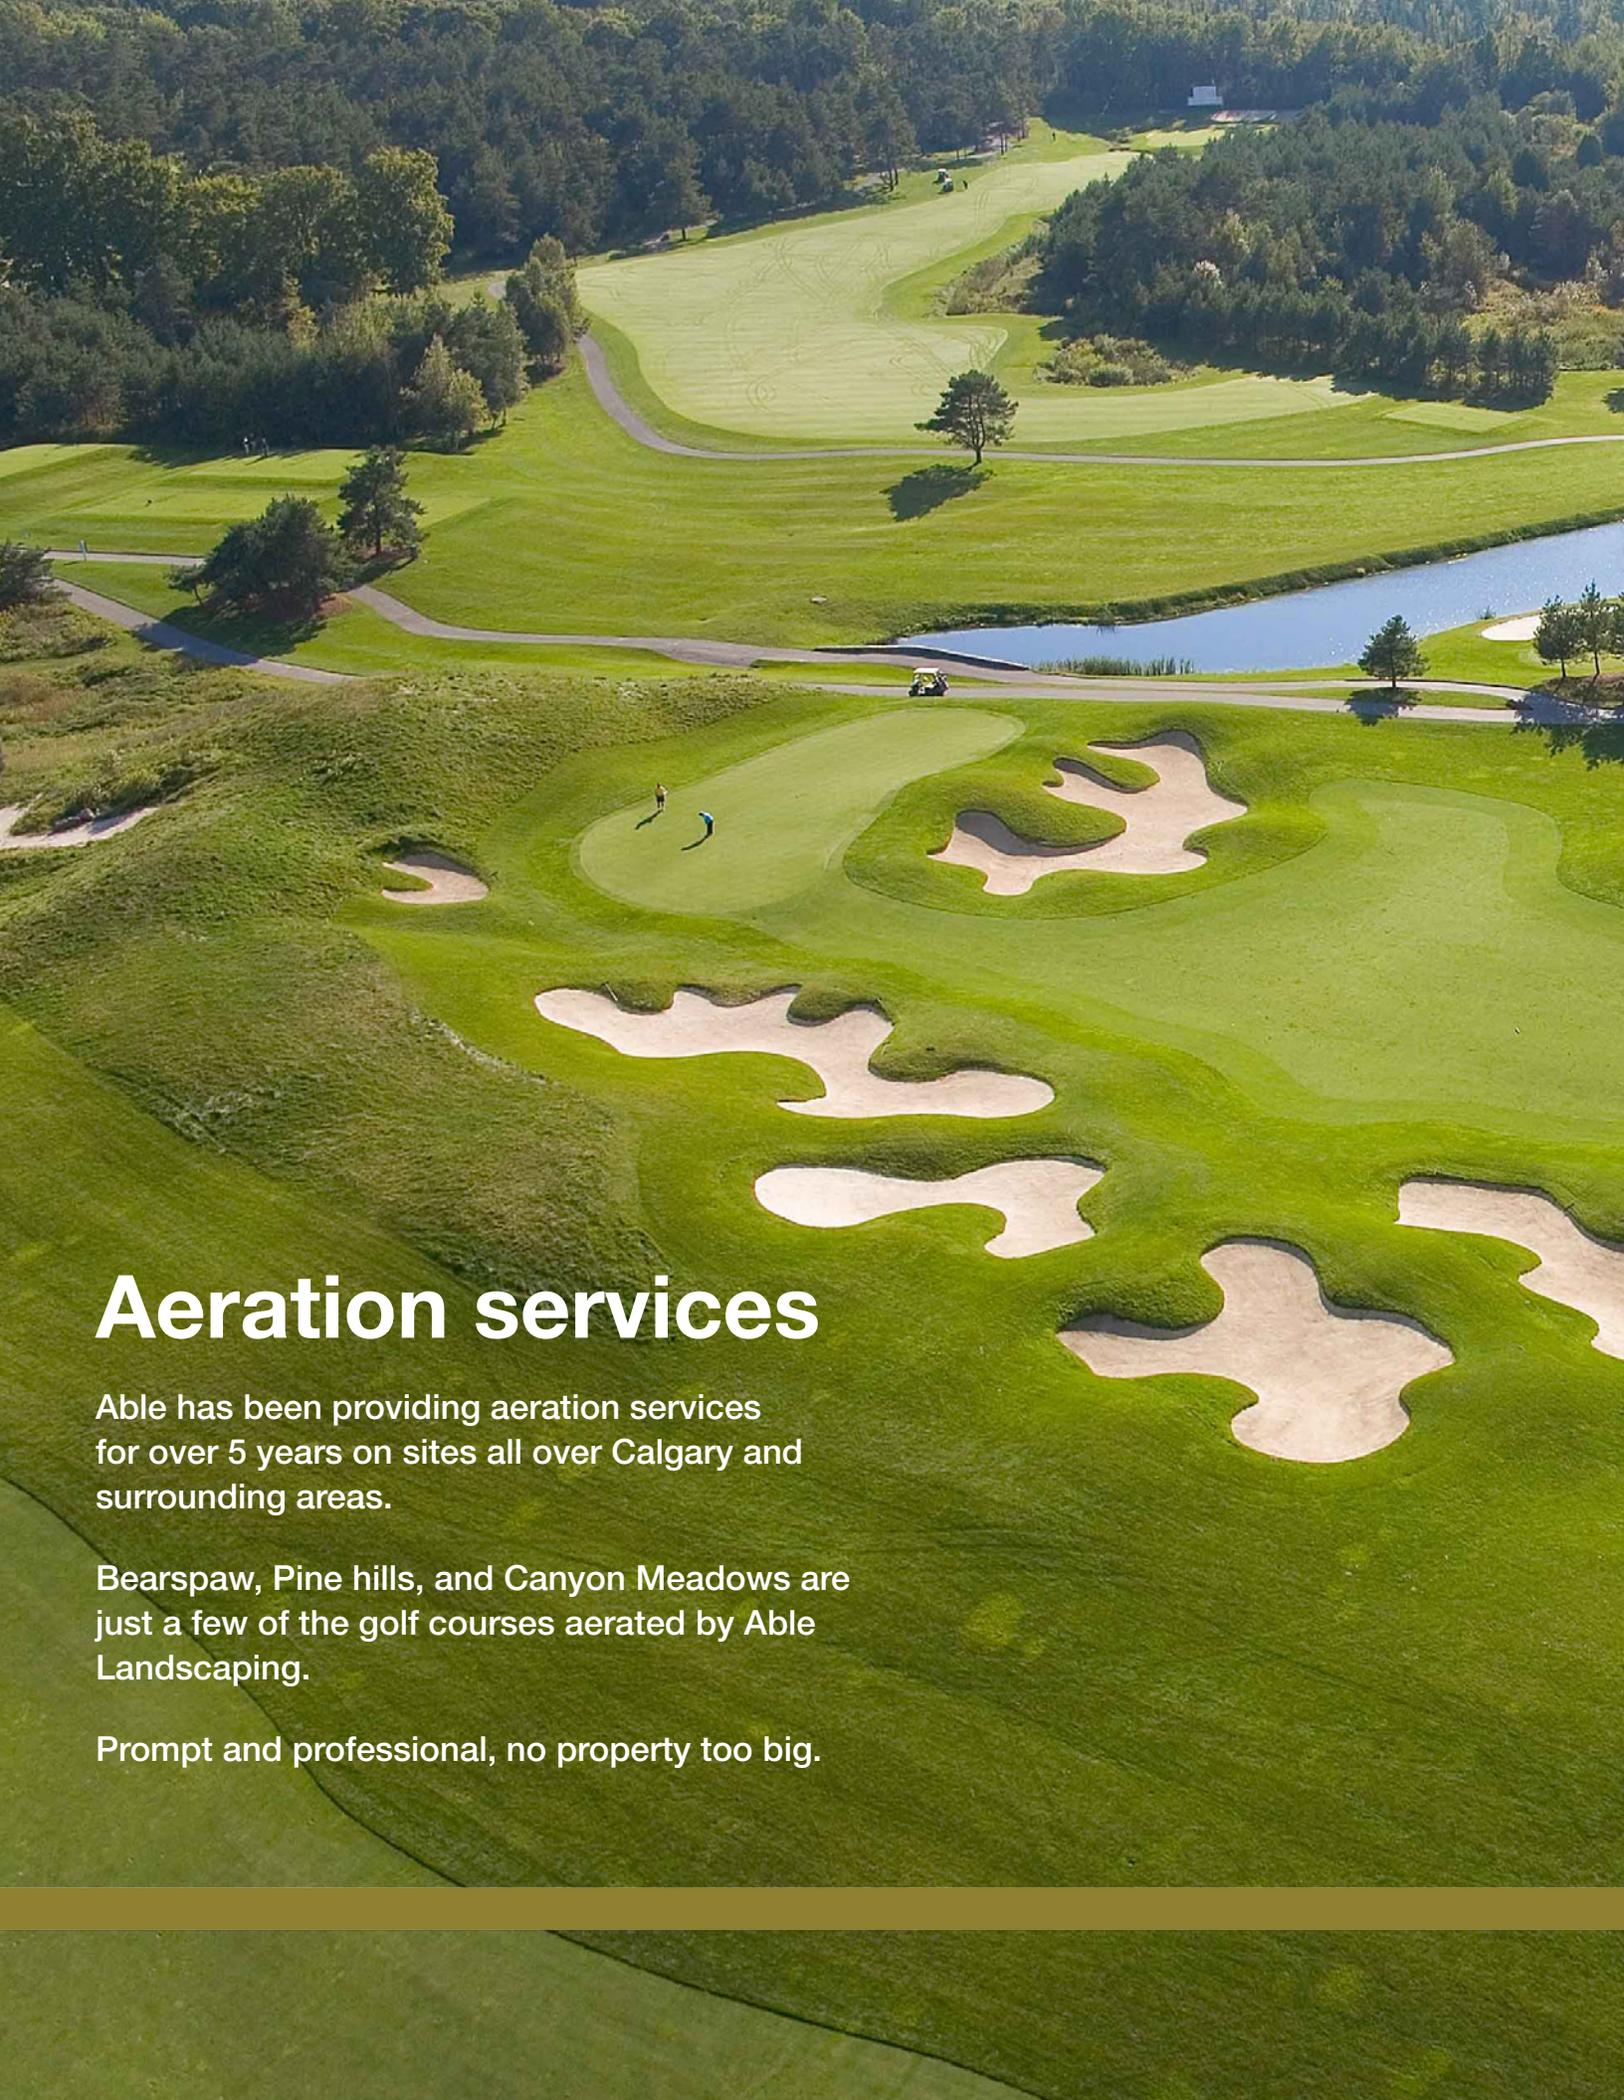

# Experience with a wide variety of commercial and industrial properties

Long term experience with waste water  
treatment plants, cemeteries and public parks.

*Proven Innovation. Increased productivity. Superior results.*

An aerial photograph of a golf course. The foreground shows a large green with several irregularly shaped sand traps. A person is visible on the green. In the middle ground, there is a blue pond and a golf cart on a path. The background features more green areas, trees, and a building in the distance.

# Aeration services

Able has been providing aeration services for over 5 years on sites all over Calgary and surrounding areas.

Bearspaw, Pine hills, and Canyon Meadows are just a few of the golf courses aerated by Able Landscaping.

Prompt and professional, no property too big.

## Service Team

Coordinating and responding to ever-changing weather conditions requires a highly experienced, reliable and dedicated team. Able Landscaping strictly adheres to all training and compliance standards; all personnel are fully trained and certified, they receive extensive safety and equipment training several times per season.

We believe that investing in our team members by providing regular training and evaluations are pivotal to maintaining the high level of quality that has become synonymous with Able Landscaping, all while ensuring everything we do is well above the safety standards at all times.

## Equipment

Servicing commercial clients such as the City of Calgary requires an impressive and vast equipment arsenal. Our ability to equip and accommodate an extensive array of maintenance requirements positions Able as one of the only “full service” commercial landscapers, virtually eliminating the use of subcontractors and increasing the efficiency of our work. Our continued investment in quality equipment means we are able to accommodate even the most specialized landscaping requirements, such as repairing cement and asphalt, pavement sweeping, and line painting.

In 30 years of gold standard service we have learned a very simple formula: invest and re-invest in your team and equipment. A highly trained and certified team operating a vast array of well-maintained top-of-the-line equipment is essential in meeting the grounds maintenance requirements in the ever-changing climatic conditions of southern Alberta.

*Proven Innovation. Increased productivity. Superior results.*

- Pesticide/Herbicide Spraying

Every year our list of services expands

# At Able Landscaping Safety and Quality are our top priorities

1. Three decades of commercial & industrial projects
2. Preferred vendor status by the city of Calgary
3. Prime contractor status
4. Multiple industry awards
5. Have maintained safety standards to receive C.O.R status
6. The lowest landscaping WCB incident rate in the city *viewable online*

Proven Innovation. Increased productivity. Superior results.

# Environmental Practices

At Able Landscaping, our environmental practices are second to none.

We ensure that zero debris from the maintenance of your property terminates in the City landfill. To achieve this goal, our standard work procedures include:

- Chipping and reusing all cuttings from pruning, shrubs and trees for shrub beds, maintaining moist soil and reducing the irrigation costs and demands.
- Recycling or reusing parking lot gravel (sweepings), asphalt and cement for construction fill
- Equipping cutting units with mulch decks so all grass and leaves are mulched on-site throughout the year, maintaining moist soil and reducing irrigation costs (thatch).
- Maintaining office and on-site recycling facilities.
- The use of electrical hybrids by site supervisors for all site inspections and supervision.

This has been a pivotal year for the company in growth, but also in development of our infrastructure and business processes. We will continue to focus on our internal systems over the next year.

Specific growth areas include *EARTHMOVING, ASPHALT & ROAD BUILDING*. Where ABLE is expecting a 6.7% increase in 2016 projects.

In previous years, Able has lead & managed construction projects around commercial Calgary. Able is reintroducing their Construction Division due to popular demand. This is very exciting as ABLE is highly creative and builds not only environmentally sustainable projects but also maintains a level of quality workmanship and ethics that exceed expectations and will be an area to monitor closely in the competitive Calgary market.

*Proven Innovation. Increased productivity. Superior results.*
